Dear Matt

INSTALLATION OF SUPABOARD LINING PRODUCT, AT 6 COX PLACE,
BROOME, WESTERN AUSTRALIA

Firstly please accept my apologies for the delay in sending you a letter of appreciation for the supply and installation of Supaboard for testing and assessment at 6 Cox Place Broome being a the Department of Housing Property. The Department is extremely appreciative of the effort, time and investment your company put in to trial of the product in one of our properties.

I observed the installation onsite and was impressed with the efficiency in using Supaboard in considering ease of trimming, cutting and installation. During the installation the product was subject to some extreme weather conditions and despite the exposure to the elements including some heavy rains, Supaboard remained unaffected.

The Supaboard sheeting has now been installed for 16 months and regular inspections and assessments are proving the product to be extremely durable, highly moisture resistant and I am please to advise that the Supaboard lining is performing well.

The Supaboard is maintaining its reported characteristics in that it is proving to hold up well to moisture, impact and appears to be very robust and durable. The property at 6 Cox Place has been tenanted since the refurbishment works were completed and to date there is little if any sign of wear and tear to the linings and it is anticipated this will reduce maintenance requirements in the longer term.

I would also like to extend our appreciation again to your company for the supply of the product and I have no hesitation in recommending your product for use in robust construction or similar application.

Yours sincerely

Shayne Hills
Regional Manager
Department of Housing
